Sample Questions and Their Correct Answers

Below, we present a selection of typical questions with detailed explanations to help you understand the reasoning behind the correct answers.

Sample Question 1: IFR Navigation

Question:

You are flying IFR and your VOR receiver indicates a 5-degree deviation to the right of the radial. What is the most appropriate action?

- A. Turn left to intercept the radial
- B. Turn right to intercept the radial
- C. Maintain heading and await further instructions
- D. Turn left to correct the deviation

Answer: A. Turn left to intercept the radial

Explanation:

A deviation to the right indicates that the aircraft is to the right of the desired radial. To re-intercept the radial, the pilot should turn left, which will bring the aircraft back onto the correct course. This is a fundamental principle of IFR navigation: correct deviations by turning toward the course correction.

Sample Question 2: Weather Interpretation

Question:

A METAR reports:

`KXYZ 251856Z 18015KT 1/2SM R04L/2400FT HZ +TSRA BKN005 OVC010`

What weather conditions are indicated?

- A. Clear skies with light wind and no significant weather
- B. Moderate turbulence with overcast clouds and visibility of 0.5 miles
- C. Thunderstorms with heavy rain, low cloud cover, and poor visibility
- D. Calm weather with no significant weather phenomena

Answer: C. Thunderstorms with heavy rain, low cloud cover, and poor visibility

Explanation:

Breaking down the METAR:

1. `18015KT` indicates wind from 180° at 15 knots
2. `1/2SM` visibility is half a mile, which is very poor
3. `+TSRA` signals heavy thunderstorms with rain
4. `BKN005` and `OVC010` denote broken clouds at 500 feet and overcast at 1,000 feet, respectively
5. `HZ` is haze, which can accompany thunderstorms

These conditions suggest hazardous weather, including thunderstorms, low ceilings, and limited visibility.

Sample Question 3: Regulations

Question:

Under FAR Part 91, when is a pilot required to log instrument time?

- A. Only when flying under IFR
- B. Whenever operating in weather conditions below VFR minimums
- C. When conducting any flight that requires the use of instruments for navigation
- D. When performing instrument training or flying solely on instruments

Answer: D. When performing instrument training or flying solely on instruments

Explanation:

According to FAR Part 61.51, pilots are required to log instrument time when they are conducting instrument training or when they are actually flying solely by reference to instruments. While flying IFR or in instrument meteorological conditions (IMC), logging instrument time is also essential for currency and compliance purposes.
