What is ICD 10 CM?

ICD 10 CM (International Classification of Diseases, Tenth Revision, Clinical Modification) is a standardized coding system used in the United States for classifying diagnoses and health conditions. It serves as the foundation for billing, epidemiology, and health management.

Importance of Practice Questions in ICD 10 CM

Practicing with questions helps:

1. Familiarize with coding guidelines
2. Improve diagnostic code accuracy
3. Identify common pitfalls
4. Prepare for certification exams
5. Enhance understanding of complex coding scenarios

Sample ICD 10 CM Practice Questions and Answers

Question 1: Coding for a Fracture

A 35-year-old male patient presents after a fall, sustaining a closed fracture of the right femur. What is the correct ICD-10-CM code?

Answer:

1. S72.001A – Fracture of unspecified part of right femur, initial encounter for closed fracture

Explanation:

The key points include identifying the fracture location (femur), laterality (right), and encounter type (initial). Since the fracture is closed, the code ends with 'A' (initial encounter). For specific fracture parts, further details are needed, but in this case, unspecified is acceptable if no additional info is available.

Question 2: Coding for Diabetes

A patient is diagnosed with Type 2 diabetes mellitus with diabetic retinopathy, without macular edema. Which ICD-10-CM codes should be assigned?

Answer:

1. E11.359 – Type 2 diabetes mellitus with specified ophthalmic complication, unspecified retinopathy

Explanation:

The code E11.359 specifies Type 2 diabetes with unspecified retinopathy. To be more precise, if retinopathy is documented as non-proliferative or proliferative, additional specificity might be used. Always check the documentation for the most accurate coding.

Question 3: Coding for Hypertension

A patient has a diagnosis of essential hypertension, unspecified. What is the correct code?

Answer:

1. I10 – Essential (primary) hypertension

Explanation:

This is a straightforward case where the unspecified hypertension is coded as I10, which is the default code for essential hypertension without additional details.

Question 4: Coding for a Postoperative Infection

A patient develops a superficial surgical site infection following a knee surgery. The infection is identified as a Staphylococcus aureus infection. What are the appropriate codes?

Answer:

1. T81.4XXA – Infection following a procedure, initial encounter
2. T81.4XXA – Infection following a procedure, initial encounter
3. B95.61 – Staphylococcus aureus as the cause of diseases classified elsewhere

Explanation:

The infection code T81.4XXA indicates postoperative infection, and B95.61 specifies the causative organism. Both are necessary for complete documentation.

Question 5: Coding for Mental Health Conditions

A patient is diagnosed with Major Depressive Disorder, recurrent, moderate. Which code is appropriate?

Answer:

1. F33.1 – Recurrent depressive disorder, moderate

Explanation:

This code captures the recurrent nature and moderate severity of depression. Ensure documentation specifies the severity and recurrence to select the most accurate code.
