Understanding Cybertext: Foundations and Principles

What is Cybertext?

Cybertext is a term coined by Espen Aarseth to describe texts that involve a level of interaction between the reader and the text itself. Unlike traditional linear texts, cybertexts are characterized by their non-linear, often multi-layered structure, allowing for multiple pathways to meaning.

Key features of cybertext include:

1. Interactivity: Readers make choices that influence the narrative or content.
2. Non-linearity: The text does not follow a fixed sequence; it adapts based on user input.
3. Procedurality: The text operates through rules or algorithms that generate or alter content.
4. Multimodality: Integration of various media forms such as text, images, sound, and video.

The Role of Cybertext in Modern Digital Culture
