Understanding the Malayalam Calendar: An Overview

The Malayalam calendar, also known as the Kollam Era or Kollavarsham, is a solar calendar used predominantly in the Indian state of Kerala. It is deeply intertwined with the region's cultural, religious, and agricultural practices. The calendar's foundation rests on the solar cycle, with months aligned according to the Sun's transit through specific zodiac signs. Historical Background and Origins The Malayalam calendar traces its origins to ancient Indian timekeeping systems. It is believed to have been established around the 9th century CE, with the Kollam Era starting in 825 CE, marking the foundation of the city of Kollam (Quilon). This era is used as the chronological reference, making 2005 in the Gregorian calendar correspond to the year 1182 in Kollavarsham. Core Features of

the Malayalam Calendar - Solar-based system: Unlike the lunar calendar used in many other Indian traditions, the Malayalam calendar follows the solar cycle, ensuring the months align with the Sun's position. - Months: The calendar comprises 12 months, each associated with a zodiac sign and specific agricultural and religious festivals. - New Year: The Malayalam New Year, known as Vishu, falls on the first day of the month of Medam (mid-April), symbolizing renewal and prosperity. - Lunar and solar festivals: The calendar incorporates various festivals based on lunar and solar positions, including Vishu, Onam, and Thiruvathira.

The Structure of the 2005 Malayalam Calendar

Year and Era The year 2005 in the Gregorian calendar corresponds to 2005 Kollavarsham in the Malayalam calendar.
