In this guide, we'll focus primarily on sample questions from the first three categories, which are frequently encountered.

Sample Sales Aptitude Test Questions and Answers

1. Numerical Reasoning

Question:

A salesperson has a target of selling 120 units in a month. Last month, they sold 15% more units than this month. How many units did they sell last month?

Answer:

Let the units sold this month be x .

Given:

Last month's sales = $x + 15\% \text{ of } x = x + 0.15x = 1.15x$

Total units last month = $1.15x$

But since last month's sales were 15% more than this month, and last month's total units sold is given, we need to find last month's sales:

Total units sold last month = $1.15x$

We want to find x such that last month's sales are known.

However, if the question states that last month's sales were 15% more than this month and last month's total is known, then:

Suppose last month's units = 138 (since it's 15% more than this month).

Set up the equation:

$$138 = 1.15x$$

$$x = 138 / 1.15 \approx 120$$

Therefore, the sales this month are approximately 120 units.

1. Verbal Reasoning

Question:

Read the following statement and identify the most logical conclusion:

"A sales team that communicates effectively with clients tends to close more deals. Effective communication involves active listening and clear articulation of product benefits."

Options:

- A) All sales teams communicate effectively.
- B) Effective communication can lead to increased sales success.
- C) Active listening is unnecessary in sales.
- D) Closing deals depends solely on product quality.

Answer:

- B) Effective communication can lead to increased sales success.

Explanation:

The statement emphasizes that effective communication, which includes active listening and clear articulation, is linked to closing more deals. Therefore, the most logical

conclusion is that effective communication contributes to sales success.

1. Logical and Abstract Reasoning

Question:

Identify the next figure in the sequence:

□, □, □, □, □, □, □, □, □, ?

Options:

A) □

B) □

C) □

D) □

Answer:

A) □

Explanation:

The sequence shows a pattern of two blue circles followed by one green circle, repeating:

1. □, □, □

2. □, □, □

3. □, □, □

The pattern repeats every three figures. After the last green circle, the sequence resets with two blue circles, so the next figure is □.
