Structural Elements of the Short Story

Narrative Style and Perspective

Most American Embassy stories utilize a third-person limited perspective, providing insight into a protagonist—be it a diplomat, local staff, or a visitor—whose internal thoughts and emotions drive the narrative. This perspective fosters intimacy and allows readers to experience the subtleties of diplomatic life from a personal standpoint.

Some stories experiment with shifting viewpoints, offering multiple perspectives to portray the multifaceted nature of diplomatic interactions. This technique enhances the narrative's depth, illustrating that behind each diplomatic incident or encounter lies a human story with its own motives and misunderstandings.

The embassy setting is often depicted as a liminal space—neither fully American nor entirely local—serving as a symbolic arena for cultural negotiation. Descriptive language emphasizes the physical environment: the formal reception halls, guarded gates, and the blend of American and host country architecture.
