Limitations and Criticisms

Regional Bias

While the book strives to present globally relevant guidelines, its primary focus appears aligned with Indian obstetric practice. This regional bias may limit applicability in certain international contexts, particularly where resource availability differs.

Limited Coverage of Some Subspecialties

Although comprehensive overall, sections on subspecialties such as maternal-fetal medicine, reproductive endocrinology, and perinatal pathology are relatively concise. Advanced practitioners seeking in-depth exploration may need supplementary texts.

Lack of Digital Integration

In an era increasingly dominated by digital learning, the textbook's reliance on traditional print format might be seen as a drawback. The absence of integrated online resources, interactive modules, or access to supplementary multimedia content reduces its engagement potential.
