1. **QUESTION:** What is the purpose of the `main` function in a C program?
ANSWER: The `main` function is the entry point of a C program. It is the first function that is executed when the program starts. It is used to initialize variables, call other functions, and perform the main logic of the program.
2. **QUESTION:** What is the difference between a variable and a constant in C?
ANSWER: A variable is a memory location that can store a value that can change during the execution of a program. A constant is a memory location that stores a value that cannot change during the execution of a program.
3. **QUESTION:** What is the difference between a pointer and a reference in C?
ANSWER: A pointer is a variable that stores the memory address of another variable. A reference is a variable that stores the memory address of another variable, but it is used to access the variable directly, without the need for a pointer.
