

787 Production List

787 production list: An In-Depth Overview of Boeing's Dreamliner Manufacturing Timeline The **787 production list** provides a comprehensive overview of the manufacturing and delivery history of Boeing's groundbreaking 787 Dreamliner series. Since its inception, the 787 has revolutionized commercial aviation with its advanced technology, fuel efficiency, and passenger comfort. Understanding the production timeline, key milestones, and the various models produced offers valuable insights into Boeing's manufacturing excellence and the aircraft's global impact.

Introduction to the Boeing 787 Dreamliner

The Boeing 787 Dreamliner is a family of long-haul, wide-body, twin-engine jet airliners developed by Boeing Commercial Airplanes. First introduced in 2007, the 787 was designed to optimize fuel efficiency, reduce operating costs, and improve passenger experience. Its innovative composite materials make up approximately 50% of the primary structure, enabling lighter weight and enhanced aerodynamics.

Development and Certification Milestones

The development of the 787 Dreamliner faced numerous challenges, including supply chain complexities and design adjustments. Despite delays, Boeing achieved critical milestones such as: - First Flight: December 15, 2009 - Certification: Achieved from the FAA and other global regulators in August 2011 - Entry Into Service (EIS): October 26, 2011, with All Nippon Airways (ANA) These milestones set the stage for the subsequent production phases, which are detailed in the 787 production list.

The 787 Production List: An Overview

The production list captures every aircraft built, from the initial prototypes to the latest deliveries. It reflects Boeing's manufacturing cadence, customer commitments, and the evolution of the 787 program.

Initial Production and Early Aircraft (2011-2013)

The first 787s produced were designated as prototypes and test aircraft, used for certification and testing purposes. After certification, Boeing began delivering the aircraft to airline customers. Key aircraft in this phase: - ZA001 and ZA002: The first two test aircraft, primarily used for testing and certification. - First customer delivery: To All Nippon Airways (ANA), Flight Number NH001, delivered on September 25, 2011. Production Highlights: - The initial batch of aircraft was assembled at Boeing's

Everett Factory in Washington. - Early deliveries focused on the 787-8 model, with a handful of test aircraft and early customer aircraft.

Expansion of the 787 Family (2014-2018)

During this period, Boeing expanded the 787 lineup to include new variants to meet diverse airline needs. Key variants introduced: - 787-8: The original version, seating approximately 242 passengers. - 787-9: Launched in 2013, entered service in 2014, with increased range and capacity, seating around 290 passengers. - 787-10: Announced in 2017, introduced as the largest 787 variant, optimized for high-density routes, seating up to 330 passengers. Production milestones: - The 787-9 began deliveries in 2014, with the first aircraft (ZA004) delivered to Air New Zealand. - The 787-10 entered service in 2018, with the first delivery to Singapore Airlines. Production list highlights: | Aircraft Model | Serial Number | Customer | Delivery Date | Notes | ||||| | 787-8 | ZA001 | Test | 2011-09-25 | First delivery | | 787-8 | ZA002 | Test | 2011-10-07 | Certification test aircraft | | 787-8 | ZA003 | ANA | 2012-05-23 | First operational aircraft | | 787-9 | ZA004 | Air New Zealand | 2014-07-31 | First 787-9 delivery | | 787-10 | ZA006 | Singapore Airlines | 2018-03-25 | First 787-10 delivery |

Production Challenges and Delays

The 787 program experienced some production hiccups, including supply chain disruptions and manufacturing adjustments, leading to delays in aircraft deliveries. Notable issues included: - Battery problems in 2013: Grounding of the fleet due to lithium-ion battery fires. - Supply chain bottlenecks: Delays in fuselage and wing component deliveries. - Production rate adjustments: Boeing reduced production rates temporarily to address quality control issues. Despite these challenges, Boeing resumed steady production, increasing output as supply chain issues were resolved.

Current Production Fleet (2019-2023)

As of October 2023, Boeing has continued to expand and refine its 787 production list, with hundreds of aircraft delivered worldwide. Key recent aircraft: - The production rate increased from 12 to 14 aircraft per month in 2022. - The focus shifted towards the 787-9 and 787-10 variants, which dominate the current fleet. Recent deliveries include: - Aircraft serial numbers in the range of ZB and ZC series. - Major customers include airlines like American Airlines, Qatar Airways, Japan Airlines, and Ethiopian Airlines.

Notable 787s in the Current Production List: - ZB001: The first 787-8 built in the second production phase, delivered to Air Canada. - ZB1000 Series: Includes aircraft with extended range capabilities or special

configurations.

Future of Boeing 787 Production

Boeing's production list continues to grow as demand for the 787 remains strong. The company plans to:

- Increase production capacity to meet global airline orders.**
- Introduce new variants or upgrades, such as improved fuel efficiency or cabin configurations.**
- Focus on sustainability, including potential upgrades for greener operations.**

Order backlog: As of 2023, Boeing has thousands of orders for various 787 models, indicating a promising future for the aircraft family.

Summary: Key Takeaways from the 787 Production List

- The 787 production list chronicles the journey from prototype to a global fleet serving major airlines.**
- The aircraft family includes three main variants: 787-8, 787-9, and 787-10.**
- Production commenced in 2011, with steady growth despite early challenges.**
- Boeing has delivered over 1,500 aircraft as of 2023, with more in the pipeline.**
- The program continues to evolve, with new orders and potential innovations on the horizon.**

Conclusion

The 787 production list encapsulates a decade of Boeing's innovation, resilience, and commitment to advancing commercial aviation. From the first prototype to a vital component of global airline fleets, the Dreamliner's manufacturing history reflects Boeing's dedication to quality and efficiency. As the aircraft continues to operate across continents, its production legacy underscores the importance of strategic planning, supply chain management, and technological advancement in modern aerospace manufacturing. Understanding the production list not

only offers insight into Boeing's manufacturing milestones but also highlights the aircraft's role in shaping the future of air travel. With ongoing orders and continuous improvements, the Boeing 787 remains a symbol of innovation and progress in the aerospace industry.

787 Production List: An In-Depth Look at the Boeing Dreamliner Fleet The Boeing 787 Dreamliner has revolutionized commercial aviation since its first delivery in 2011. Known for its fuel efficiency, advanced materials, and passenger comfort, the 787 has become a cornerstone in many airline fleets worldwide. Central to understanding the impact and reach of this aircraft is examining the 787 production list, which details the various models, variants, and individual aircraft that have been built and delivered over the years. This comprehensive review aims to provide an expert-level overview of the 787 production history, the different variants, and what distinguishes each aircraft in the fleet.

Overview of the Boeing 787 Production Program

Boeing's 787 program was launched in 2004 with ambitious goals: to create a highly efficient, technologically advanced wide-body aircraft suitable for long-haul routes. The first 787 prototype, designated ZA001, took flight on December 15, 2009. After a series of rigorous testing and certification processes, the first customer delivery occurred on September 26, 2011, to Japan's All Nippon Airways (ANA). The production list of the Boeing 787 is not just a simple inventory; it reflects a complex, phased manufacturing process involving multiple variants, production milestones, and customer-specific configurations. As of October 2023, Boeing has delivered over 1,600 787s, with ongoing production to meet global demand.

Variants of the Boeing 787

The 787 family comprises three primary variants, each tailored to different market needs:

787-8

Introduction & Purpose: The 787-8 is the original variant, introduced as a smaller, more efficient aircraft suitable for medium to long-range routes. Its design emphasizes fuel economy and passenger comfort, making it an attractive option for airlines seeking to serve niche markets or operate point-to-point routes. **Specifications:** - Length: 186 ft 10 in (56.7 m) - Seating Capacity: 242 passengers (typical two-class configuration) - Range: approximately 7,305 nautical miles (13,530 km) - Maximum Takeoff Weight (MTOW): 502,500 lbs (227,930 kg) **Production & Delivery:** The first 787-8 was delivered to ANA in September 2012. As of 2023, Boeing has produced around 600 units, with several still in service or in the final stages of delivery.

787-9

Evolution & Market Position: The 787-9 is a stretched version of the 787-8, offering increased passenger capacity and range. It became the most popular variant in the family due to its versatility and efficiency for a broad spectrum of routes. **Specifications:** - Length: 206 ft 1 in (62.8 m) - Seating Capacity: approximately 296 passengers (two-class) - Range: about 7,530 nautical miles (13,950 km) - MTOW: 560,000 lbs (254,000 kg) **Production & Delivery:** First delivered to Air New Zealand in August 2014, the 787-9 accounts for the majority of 787 orders. Boeing has produced over 900 units of the 787-9, making it the backbone of the 787 fleet.

787-10

Design & Market Focus: The 787-10 is the longest variant, optimized for high-density, medium-haul routes. It features a stretched fuselage and enhanced passenger capacity, but with a slightly reduced range compared to its shorter siblings. **Specifications:** - Length: 224 ft 1 in (68.3 m) - Seating Capacity: approximately 330 passengers (two-class) - Range: around 6,430 nautical miles (11,910 km) - MTOW: 560,000 lbs (254,000 kg) **Production & Delivery:** First delivered to Singapore Airlines in March 2018, the 787-10 is less numerous than the 787-9 but is favored for dense routes. As of 2023, roughly 150 units have been built.

The 787 Production List: Details and Milestones

The production list of the Boeing 787 encompasses individual aircraft serial numbers, customer details, delivery dates, and specific configurations. This detailed record is crucial for fleet management, spare parts logistics, and historical analysis.

Serial Numbering and Production Tracking

Every 787 aircraft is assigned a unique serial number (MSN - Manufacturer's Serial Number), which starts from MSN 60001 for the first 787-8 and continues sequentially. The serial number system allows Boeing and airlines to trace each aircraft's history from manufacturing to retirement.

Major Production Milestones

- First 787-8 Delivery: September 26, 2011, to ANA - First 787-9 Delivery: August 2014 to Air New Zealand - First 787-10 Delivery: March 2018 to Singapore Airlines

Production List Overview (Sample & Trends)

While an exhaustive list would contain hundreds of entries, key insights include: - Total Units Delivered (as of October 2023): over 1,600 aircraft - Distribution by Variant: - 787-8: ~600 units - 787-9: ~900

units - 787-10: ~150 units - Major Customers: - ANA (All Nippon Airways) - United Airlines - American Airlines - Japan Airlines - Air Canada - Qatar Airways - Singapore Airlines - Ethiopian Airlines - Production Rate: Boeing ramped up production from approximately 10 aircraft per month in 2017 to over 14 per month by 2023, reflecting strong market demand.

Key Features and Configurations in the Production List

Each aircraft in the production list can vary significantly based on customer specifications, including: - Interior Layouts: Premium economy, lie-flat seats, additional lavatories, and custom branding - Technical Modifications: Winglet options (standard or raked), optional fuel tanks, or upgraded aerodynamics - In-Flight Entertainment and Connectivity: Varying levels of passenger amenities depending on airline preferences Understanding these variations is essential for fleet management and maintenance planning.

Notable Production Challenges and Resolutions

The Boeing 787 program faced several challenges during its production lifecycle: - Initial Manufacturing Delays: Due to supply chain issues and design changes, some early aircraft experienced delays in delivery. - Battery Certification Issues (2013-2014): Led to temporary grounding of the fleet, but subsequent certifications allowed production to resume smoothly. - Supply Chain Optimization: Boeing worked closely with suppliers like Mitsubishi, Spirit AeroSystems, and others to streamline production and increase output. These challenges impacted the production list in terms of delays, cancellations, and modifications, but overall, the program has established a robust and growing fleet.

The Future of the 787 Production List

Boeing continues to expand the 787 family's production capacity, with plans to increase monthly output and introduce new variants or configurations based on market demand. The production list will evolve as new aircraft are built, delivered, and integrated into airline fleets worldwide. Key future trends include: - Increased Production Rates: Targeting over 20 aircraft per month in the coming years - New Customer Orders: As airlines phase out older aircraft, the 787's presence will grow - Fleet Modernization Initiatives: The 787's role in replacing older models like the Boeing 767 and 757

Conclusion: The Significance of the 787 Production List

The Boeing 787 production list is more than just a record of manufactured aircraft; it's a reflection of modern aviation's technological evolution, market dynamics, and airline strategic planning. Each serial number and delivery date encapsulates a story of innovation, collaboration, and adaptation. From the initial rollouts of the 787-8 to the burgeoning fleet of 787-9s and 787-10s, Boeing's production efforts demonstrate a commitment to efficiency, passenger comfort, and environmental sustainability. As the

fleet continues to grow, the production list will serve as a vital resource for industry analysts, airline operators, and aviation enthusiasts eager to track the Dreamliner's global footprint. The 787's production history underscores its status as a game-changer—an aircraft that has reshaped expectations for long-haul travel and fleet modernization. With ongoing deliveries and technological advancements, the future of the 787 production list promises to be as dynamic and innovative as the aircraft itself.

Questions & Answers About 787 production list

No	Question	Answer
1	What is included in the Boeing 787 production list?	The Boeing 787 production list includes all the variants of the Dreamliner, such as the 787-8, 787-9, and 787-10, along with their respective serial numbers and manufacturing details.
2	How many Boeing 787 aircraft have been produced so far?	As of October 2023, over 300 Boeing 787 aircraft have been delivered worldwide, with production ongoing to meet airline demand.
3	Which airlines have the largest Boeing 787 fleets according to the production list?	Major operators with large Boeing 787 fleets include All Nippon Airways, United Airlines, and American Airlines, as reflected in the latest production and delivery records.
4	Are there any upcoming Boeing 787 variants in the production list?	Currently, the main variants in production are the 787-8, 787-9, and 787-10. There are no announced new variants, but ongoing updates may appear in future production lists.
5	What is the typical lead time from order to production for a Boeing 787?	The lead time from order placement to aircraft delivery is generally around 2 to 3 years, depending on the model and customization requirements listed in the production schedule.
6	How has the Boeing 787 production list evolved over recent years?	The production list has expanded as Boeing increased manufacturing capacity, with a steady rise in deliveries and the introduction of new serial numbers for different variants.
7	Where can I find the latest Boeing 787 production list updates?	The latest production and delivery updates are available on Boeing's official website, aviation industry news sources, and specialized aircraft tracking platforms.
8	What are the key serial numbers in the Boeing 787 production list?	Key serial numbers correspond to individual aircraft and are used to track production status, delivery dates, and specific configurations for each 787 built.
9	Are there any production issues affecting the Boeing 787 list?	While Boeing has faced some production challenges in the past, current reports indicate steady progress with no major disruptions reported in the latest production list updates.

10	How does the Boeing 787 production list impact airline fleet planning?	The production list provides airlines with visibility into delivery schedules, helping them plan fleet expansions, replacements, and maintenance schedules accordingly.
