Core Principles and Philosophy

Cognitive-Behavioral Therapy (CBT) as the Foundation

At its core, the Feeling Good Workbook is grounded in CBT, a well-established psychological treatment focusing on the interplay between thoughts, feelings, and behaviors. Burns emphasizes that:

1. Negative automatic thoughts contribute significantly to feelings of depression and anxiety.
2. Cognitive distortions—faulty or exaggerated thought patterns—maintain these negative emotions.

3. Changing thoughts can lead to emotional relief and behavioral change.

1. All-or-Nothing Thinking
2. Overgeneralization
3. Mental Filtering
4. Disqualifying the Positive
5. Jumping to Conclusions
6. Catastrophizing
7. Personalization and Blame

Self-Help and Empowerment

A distinctive aspect of Burns' philosophy is empowering individuals to be their own therapists. The workbook encourages self-reflection, awareness, and practice, fostering a sense of control over one's mental health rather than reliance solely on external intervention.

Pleasant Activity Scheduling

A specific form of behavioral activation, this technique encourages planning enjoyable activities, combating inertia and withdrawal often associated with depression.

Challenging Cognitive Distortions

Burns provides structured exercises to dispute distorted thoughts, including:

1. Evidence gathering (What evidence supports or refutes the thought?)
2. Reframing the thought into a more balanced perspective.
